

### **Important Information About Fats, Oils, & Grease ('FOG') Permits**

Please note that if your food establishment prepares food that produces fats, oil, and grease waste, ***you are required by the State of Massachusetts DEP and the Town of Rockport to install and maintain a grease trap/interceptor to eliminate sewer backups and overflows caused by fats, oil, and grease (FOG) discharge.*** You will need to obtain a permit from the Town in order to discharge this waste. Please contact Gary LeBlanc, the Town's FOG coordinator 978-546-5000, extension 40163 to apply for a permit to discharge these wastes. **Failure to obtain a permit to discharge the waste or maintain the grease traps are subject to violation fines.**
